Abstract

In recent past considerable work has been done on mosses of Central India region but a all-inclusive literature was lacking. Therefore in present study attempt is made to fill this lacuna. This checklist reports occurrence of 210 valid taxa under 94 genera, and 30 families of mosses from this region. Family Pottiaceae is the most diversified one represented by 34 taxa under 19 genera, while genus *Fissidens* is the largest genus with 26 taxa distributed in the central Indian bryo-geographical zone. The taxa reported without species epithet, have been excluded here. The accepted names are cited in bold. This compilation of central India mosses is first ever effort in context of the Indian mosses and would be helpful to future workers.

Keywords

Bryophyta; Central India; Checklist; Mosses

Alam, A., Rawat, K. K., Verma, P. K., Sharma, V. and Gupta, D. S. 2015. Moss flora of Central India. *Plant Science Today* 2(4): 159-171. <http://dx.doi.org/10.14719/pst.2015.2.4.126>

Introduction

The unique bio-geographical position of India along with its varied climatic condition in different parts of the country due to various physiographical features support a luxuriant and diversified bryophyte flora in the country, including more than 1500 species of mosses (Dandotiya *et al.*, 2011; Alam, 2014). However, the exact number of bryophytes in India is constantly changing as regular reports are emerging out covering unexplored localities and taxa. To study the enormous bryo-floristic wealth of the country, Pande (1958) proposed division of India into 7 bryo-geographical zones (i) West Himalayan territory, (ii) East Himalayan territory, (iii) Gangetic plains (iv) Punjab and west Rajasthan (v) Central India (vi) Western Ghats and (vii) Eastern Ghats and the Deccan plateau (Fig. 1).

The Central Indian Territory is comparatively less rich in cryptogam elements than Himalayas or Western Ghats. However, with three important Biosphere Reserves namely Pachmarhi, Achanakmar-Amarkantak and Panna, along with 11 national parks and a number of sanctuaries, Bhimbetka world heritage site, etc., central India is an important biodiversity zone, including diversity.

When we started the work, the biggest problem we came across, was the delimitation of Central Indian bryo-geographical zone. A number of studies have been made to assess the bryo-wealth of the Central Indian zone, however, none of them discussed the problem. Like other bryo-geographical zones proposed by Pande (1958), the Central Indian zone is also not clearly defined and thus created lots of confusion while assessing the distribution of various taxa. Pande (1958) made the division by thick lines and broadly included some part of Rajasthan, Madhya Pradesh, Uttar Pradesh, Bihar, Gujarat and Odisha. However, significant problem arose while discussing the distribution of various taxa due to ill-defined boundaries of the various zones. For example, Pande (1958) broadly included a large portion of Odisha under Central Indian zone, however, as a matter of fact, major part of Odisha comes under the Eastern Ghats and east coasts region, which is already being treated as a different bryo-geographical zone. Hence, a dilemma was there, to place the taxa reported from various localities of Odisha, whether under Central Indian zone or in the Eastern Ghats zone. Similarly, some districts of southern Uttar Pradesh plateau region needed specific assessment for placement either under Gangetic plains or Central Indian zone.

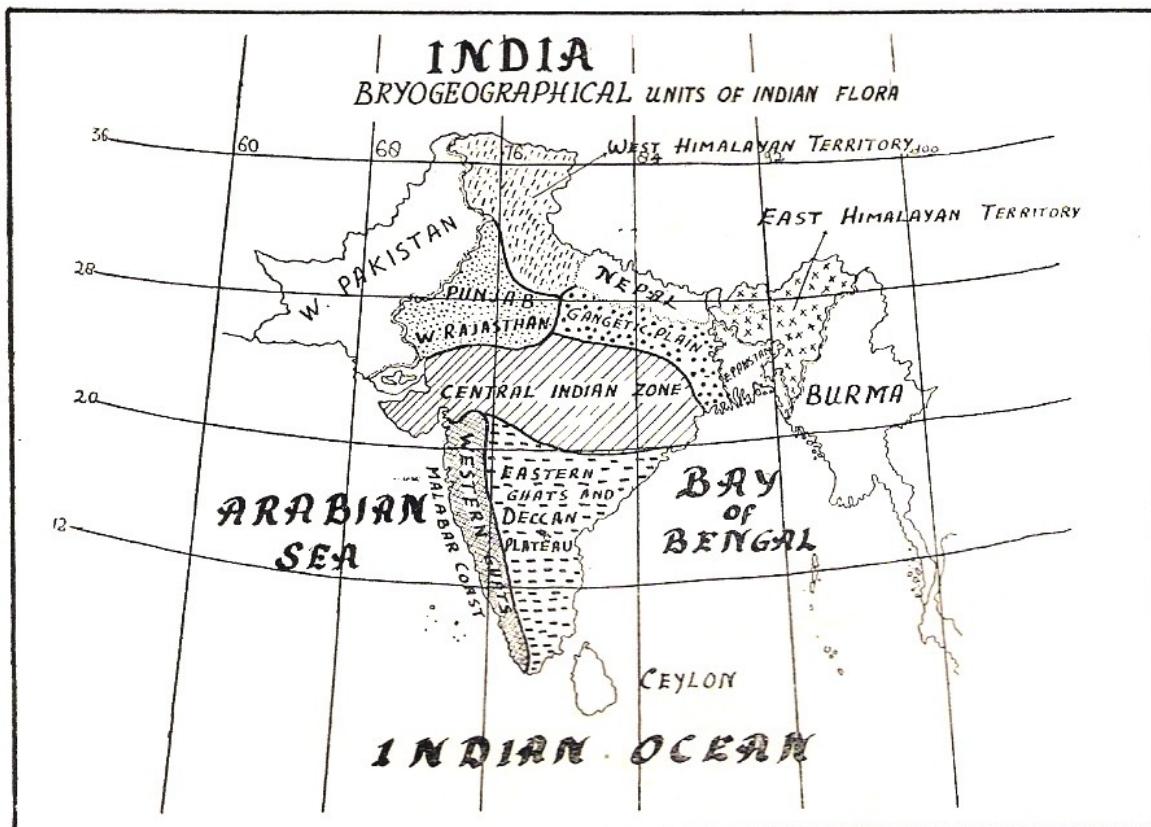

Fig. 1. Bryo-geographical territories of India proposed by Pande (1958) [Figure from “The Journal of the Indian Botanical Society 37(1):10, 1958”]

Further, due to the formation of new states like Chhattisgarh, Jharkhand etc., it felt necessary to reassess the boundaries of Central Indian bryo-geographical zone for the convenience of distribution analysis. Therefore, in this work, parts of Odisha, earlier included in the Central Indian zone by Pande (1958), has been excluded and entire Odisha state is proposed to be included in Eastern Ghats and east coast bryo-geographical zone. Southern Rajasthan, however, has been included here due to its unique blend of climatic conditions and bryo-diversity, different from rest of Rajasthan. Similarly, Bundelkhand region and Sonbhadra district of Uttar Pradesh and Purulia district of West Bengal are treated here in Central Indian zone. Thus, in the present study, we are providing information based on the reports from the following territories in Central Indian bryo-geographic zone (Fig. 2) with a hope that future works may precisely define the area and extent of other bryo-geographical zones also.

Madhya Pradesh: Geographically Madhya Pradesh is a mixture of different plateaus namely Betul, Bhander Bina, Chhindwara, Damoh, Kanjarda, Kauntel, Khichiwara, Kukral, Malwa, Morena, Rewa, Sandwara, Shivpuri, Umatwara, and Vidisha plateaus along with various hills namely Asirgarh, Barwani, Bijawar, Kalibhit, Jhabua, Mahadeo, Mathwar and Satpura hills, Vindhyan ranges and Vindhyan scrapland. Various

river systems like Narmada, Tapti, Sone, Chambal, Betwa and Indrawati form some beautiful valleys viz. Narmada valley, Kanchan valley and Kunnu valley. The unique topography with its floristic wealth provided the state its 3 Biosphere reserves, namely Panna, Amarkantak and Pachmarhi as well as 11 national parks. The Pachmarhi biosphere reserve has been the center of attraction of botanists, including bryologist since long and most of the bryological reports of Central India originated from here. Recently, some work has also been carried out in Amarkantak Biosphere reserve and has been included here.

Chhattisgarh: This recently formed state has northern hilly parts comprising of eastern end of Satpura range and western edge of the Chotta Nagpur plateau while some southern parts of state are reaching to Deccan plateau. The central part of state has fertile plains, reaching to gangetic basin in north and Mahanadi basin and in south. Achanakmar reserve has been most studied in terms of bryo-diversity while the rest of area is still neglected.

Gujarat: The state of Gujarat with a wide variation of geo-climatic conditions due to a variety of physiographic features including northern and southern rocky highlands, northern and central alluvial plains, the peninsula of Kachchh and Saurashtra, Rann and Banni of Kachchh and costal zones of Gujarat with altitude ranging from sea level to

Fig. 2. Map of India (not to scale) showing proposed extent of Central Indian bryo-geographical zone

1000m, provides unique opportunities for bryophytes to flourish. The area has recently been investigated by different workers, particularly Chaudhary *et al.* (2006) who provided an account of 67 species of bryophytes from the state.

Jharkhand: This state which comprises of the major part of the Chhota Nagpur plateau has been the least known in terms of bryo-diversity and no literature was available to us from the state except occasional reports

in the work of Gangulee (1969-72; 1974-78; 1978-80). However, further explorations in the state may yield interesting results and therefore, need to be assessed thoroughly.

Southern Rajasthan

Southern Rajasthan is botanically most important part of Rajasthan. It is a fairly well defined zone, which includes mainly Mount Abu (Sirohi district),

Kumbhalgarh (Rajsamand district), Dungarpur, Parasramji (Pali district), Udaipur and Banswara (Deora and Guhil, 2014). The area is dominated by Aravali ranges, with an altitude ranging from 600 to 1200 m above sea level. The area is fairly forested with comparatively humid climate than other parts of Rajasthan hence provide suitable conditions for the growth of bryophytes. However, maximum focus of bryological studies has been centered on Mount Abu (Sirohi district) while the remaining areas are still less explored.

Southern Plateau region of Uttar Pradesh

The area shows clear demarcation from alluvial plains of Uttar Pradesh and includes Bundelkhand region of Uttar Pradesh (including Lalitpur, Jhansi, Hamirpur, Mahoba, Banda, Chitrakoot districts), Meja and Karchhana Tehsil of Allahabad, Chakia Tehsil of Varanasi, entire Mirzapur south of Ganga and Sonbhadra district (Jha, 2007). However, at present we hesitate to include Allahabad, Varanasi and Mirzapur and only Bundelkhand region and Sonbhadra district are treated here as a part of Central Indian bryogeographical zone.

Purulia district of West Bengal

Most of the district comes under Chhota Nagpur plateau, hence treated here as part of Central Indian zone, instead of Gangetic plains.

Materials and Methods

The present compilation is based on the all available literature till date from above mentioned areas. The taxa reported without species epithet, have been excluded. The accepted names are cited in bold. The classification scheme follows Goffinet *et al.* (2008).

Summary of Central Indian mosses:

Family Archidiaceae - *Archidium* (1)

Family Bartramiaceae - *Bartramidula* (1), *Bartramia* (2), *Philonotis* (4)

Family Brachytheciaceae- *Rhynchostegium* (1)

Family Bruchiaceae - *Trematodon* (2)

Family Bryaceae – *Anomobryum* (2), *Brachymenium* (8), *Bryum* (15), *Gemmabryum* (1), *Pohlia* (2), *Ptychostomum* (2)

Family Dicranaceae – *Brothera* (1), *Campylopus* (4), *Cynodontium* (1), *Dicranella* (1), *Leucobryum* (1), *Leucoloma* (2), *Microdus* (1)

Family Ditrichaceae - *Garckea* (2), *Wilsoniella* (1)

Family Entodontaceae - *Entodon* (8), *Erythrodontium* (1)

Family Erpodiaceae - *Aulacopilum* (1), *Erpodium* (1)

Family Fabroniaceae – *Campylodontium* (1), *Fabronia* (1), *Levierella* (1)

Family Fissidentaceae – *Fissidens* (26)

Family Funariaceae - *Entosthodon* (2), *Funaria* (1), *Loiseaubryum* (1), *Physcomitrium* (3)

Family Hookeriaceae - *Distichophyllum* (2)

Family Hypnaceae- *Bryosedgwickia* (1), *Ectropothecium* (3), *Foreauella* (1), *Homomallium* (1), *Hypnum* (1), *Isopterygium* (3), *Platygyriella* (1), *Pylaisia* (1), *Taxiphyllum* (2), *Vesicularia* (6)

Family Meteoriaceae - *Pseudobarbella* (1), *Microcampylopus* (1), *Meteoriopsis* (2)

Family Mniaceae - *Pseudopohlia* (1), *Rhizomnium* (1)

Family Neckeraceae - *Himantocladium* (1), *Pinnatella* (3), *Neckeropsis* (2), *Homaliodendron* (2)

Family Octoblepharaceae - *Octoblepharum* (1)

Family Orthotrichaceae - *Macromitrium* (1), *Micromitrium* (1), *Orthotrichum* (1)

Family Plagiotheciaceae- *Plagiothecium* (2), *Pseudotaxiphyllum* (1)

Family Polytrichaceae - *Pogonatum* (1)

Family Pottiaceae – *Anoectangium* (2), *Barbula* (3), *Broerythrophyllum* (1), *Didymodon* (1), *Gymnostomiella* (1), *Gymnostomum* (1), *Hydrogonium* (3), *Hymenostomum* (1), *Hymenostyliella* (1), *Hymenostylium* (1), *Hyophila* (5), *Pleurochaete* (1), *Pseudocrossidium* (1), *Scopelophila* (1), *Semibarbula* (2), *Timmella* (2), *Tortella* (1), *Tortula* (1), *Trichostomum* (2), *Weissia* (3)

Family Pterigynandraceae - *Trachyphyllum* (2)

Family Pterobryaceae - *Pterobryopsis* (2)

Family Racopilaceae - *Racopilum* (2)

Family Sematophyllaceae - *Aptychella* (1), *Meiothecium* (1), *Taxithelium* (1), *Wijkia* (1)

Family Splachnobryaceae - *Splachnobryum* (2)

Family Stereophyllaceae - *Entodontopsis* (4), *Stereophyllum* (6)

Family Thuidiaceae - *Pelekium* (2), *Herpetineuron* (1), *Thuidium* (3)

Family Trachypodaceae - *Diaphanodon* (2)

Ectropothecium cyperoides (Hook. ex Harv.) A. Jaeger, Ber. Thätigk. St. Gallischen Naturwiss. Ges. 1877-78: 259, 1880. MADHYA PRADESH: Tamia valley (Gupta *et al.*, 2013).

Ectropothecium dealbatum (Reinw. & Hornsch.) A. Jaeger, Ber. Thätigk. St. Gallischen Naturwiss. Ges. 1877-78: 259, 1880. MADHYA PRADESH: Tamia valley (Gupta *et al.*, 2013).

Entodon concinnus (De Not.) Paris, Index Bryol. (ed. 2) 2: 130, 1904. RAJASTHAN: Mount Abu (Alam *et al.*, 2014).

Entodon laetus (Griff.) A. Jaeger, Ber. Thätigk. St. Gallischen Naturwiss. Ges. 1876-77: 295, 1878. GUJARAT: Girnar hills (Chaudhary *et al.*, 2006; Chaudhary and Sharma, 2007).

Entodon myurus (Hook.) Hampe, Linnaea 20: 82, 1847. MADHYA PRADESH: Pachmarhi (Singh and Kaul, 2002; Handoo *et al.*, 2009). RAJASTHAN: Mount Abu (Chaudhary and Deora, 1993; Alam *et al.*, 2014).

Entodon ovicarpus Dixon, J. Bombay Nat. Hist. Soc. 39: 789, 1937. GUJARAT: Girnar hills (Chaudhary *et al.*, 2006; Chaudhary and Sharma, 2007)

Entodon plicatus Müll. Hal., Linnaea 18: 706, 1845. JHARKHAND: Chhota Nagpur (Sadni) (Gangulee, 1978-80). MADHYA PRADESH: Pachmarhi (Handoo *et al.*, 2009). RAJASTHAN: Mount Abu (Alam *et al.*, 2014).

Entodon prorepens (Mitt.) A. Jaeger, Ber. Thätigk. St. Gallischen Naturwiss. Ges. 1876-77: 294, 1878. GUJARAT: Girnar hills, Saputara (Chaudhary *et al.*, 2006; Chaudhary and Sharma, 2007). MADHYA PRADESH: Pachmarhi (Handoo *et al.*, 2009). RAJASTHAN: Mount Abu (Chaudhary and Deora, 1993; Alam *et al.*, 2014).

Entodon rubicundus (Mitt.) A. Jaeger, Ber. Thätigk. St. Gallischen Naturwiss. Ges. 1867-77: 285, 1878. MADHYA PRADESH: Amarkantak (Tiwari et al., 1995; Nath et al., 2007), Pachmarhi (Singh and Kaul, 2002; Handoo et al., 2009; Nath et al., 2007).

Entodon scariosus Renauld & Cardot, Bull. Soc. Roy. Bot. Belgique 34(2): 75, 1896. MADHYA PRADESH: Amarkantak (Tiwari et al., 1995; Nath et al., 2007)

Entodontopsis anceps (Bosch & Sande Lac.) W.R. Buck & R.R. Ireland, Nova Hedw. 41: 103, 1985. MADHYA PRADESH: Amarkantak (Tiwari et al., 1995; Nath et al., 2007, 2012), Mandla- Kanha National Park (Kapoor et al., 2011), Pachmarhi (Nath et al., 2012), Raisen- Bhimbetka (Nath and Bansal, 2009), Tamia valley (Gupta et al., 2013).

Entodontopsis nitens (Mitt.) W.R. Buck & R.R. Ireland, Nova Hedw. 41: 104, 1985. CHHATISGARH: Achanakmar (Nath et al., 2012). GUJARAT: Gurnar hills, Saputara (Chaudhary et al., 2006 as *Stereophyllum ligulatum*). JHARKHAND: Chhota Nagpur (Gangulee 1978-80 as *Stereophyllum ligulatum*). MADHYA PRADESH: Amarkantak (Tiwari et al., 1995; Nath et al., 2007, 2012), Pachmarhi (Singh and Kaul 2002 and Handoo et al., 2009 as *Stereophyllum ligulatum*; Nath et al., 2012), Tamia valley, Patalkot (Gupta et al., 2013).

Entodontopsis setschwanica (Broth.) W.R. Buck & R.R. Ireland, Nova Hedwigia 41: 105, 1985. CHHATISGARH: Achanakmar. MADHYA PRADESH: Amarkantak, Pachmarhi (Nath et al., 2012)

Entosthodon nutans Mitt., J. Proc. Linn. Soc., Bot., suppl. 1: 55, 1859. JHARKHAND: Chhota Nagpur- Parasnath, Topchachi (Gangulee, 1974-78)

Entosthodon wallichii Mitt., J. Proc. Linn. Soc., Bot., suppl. 1: 55, 1859. RAJASTHAN: Mount Abu (Nath et al., 2009).

Erpodium mangifereae Müll. Hal., Linnaea 37: 178, 1872. GUJARAT: Waghai botanical garden (Chaudhary et al., 2006; Chaudhary and Sharma, 2007) JHARKHAND: Chhota Nagpur – Ranchi (Gangulee, 1974-78). MADHYA PRADESH: Pachmarhi (Singh and Kaul, 2002; Handoo et al., 2009)

Erythrodontium julaceum (Hook. & Schwägr.) Paris, Index Bryol. 436, 1896. MADHYA PRADESH: Amarkantak (Tiwari et al., 1995; Nath et al., 2007), Pachmarhi (Singh and Kaul, 2002; Handoo et al., 2009; Nath et al., 2007).

Fabronia minuta Mitt., J. Proc. Linn. Soc., Bot., suppl. 1: 76, 1859. GUJARAT: Girnar hill (Chaudhary et al., 2006; Chaudhary and Sharma, 2007). RAJASTHAN: Mount Abu (Chaudhary and Deora, 1993; Alam et al., 2014).

Fissidens arunii Srivastava & Norkett, Proc. Bot. Soc. Kanpur (India) 1: 55, 1988. Central India (Lal, 2005, without any locality)

Fissidens asperisetus var. *andamanensis* Gangulee, Mosses of Eastern India and Adjacent regions 1: 507, 1972. MADHYA PRADESH: Pachmarhi (Nath et al., 2011b)

Fissidens bilaspurensse Gangulee, Bull. Bot. Soc. Beng. 11: 66, 1957. MADHYA PRADESH: Bilaspur (Gangulee, 1969-72)

Fissidens bryoides Hedw. in Sp. Musc., 153, 1801. GUJARAT: Girnar hill, Sabarkantha forest (Chaudhary et al., 2006; Chaudhary and Sharma, 2007). MADHYA PRADESH: Pachmarhi (Handoo et al., 2009). RAJASTHAN: Mount Abu, Udaipur (Chaudhary and Deora, 1993).

Fissidens bryoides var. *schmidii* (Mull. Hal.) R.S. Chopra and SS. Kumar, Ann. Cryptog. Phytopathol. 5: 43 GUJARAT: Saputara; Waghai Botanical Garden (Chaudhary et al., 2006, As *Fissidens bryoides* ssp. *schmidii*). JHARKHAND: Ranchi (Gangulee, 1969-72)

Fissidens ceylonensis Dozy et Molk., Ann. Sci. Nat. Bot. ser. 3, 2: 304, 1844. Central India (Lal, 2005, without any locality as *Fissidens intromarginatus* E.B. Bartram). MADHYA PRADESH: Pachmarhi (Nath et al., 2011b).

Fissidens crenulatus Mitt., J. Proc. Linn. Soc., Bot., suppl. 1: 140, 1859. Central India (Lal, 2005, without any locality as *Fissidens crenulatus* var. *crenulatus*).

Fissidens crenulatus var. *crenulatus* → **Fissidens crenulatus** Mitt.

Fissidens crispulus var. *crispulus* Brid., Musc. Rec. suppl. 4: 187, 1819. JHARKHAND: Ranchi (Gangulee, 1969-72 as *Fissidens sylvaticus*). MADHYA PRADESH: Pachmarhi (Singh and Kaul, 2002 and Handoo et al., 2009 as *F. sylvaticus* var. *zippelianus*; Nath et al., 2011b) Patalkot (Gupta et al., 2013). RAJASTHAN: Mount Abu (Chaudhary and Deora, 1993; 2001 as *F. sylvaticus* Griff.).

Fissidens curvato-involutus Dixon, Not. R. Bot. Gard. Edinburgh 19: 279, 1938 → **F. involutus** ssp. *curvato-involutus* (Dixon) Gangulee.

Fissidens diversifolius Mitt., J. Linn. In Musc. Ind. Or. 140, 1859. CHHATTISGARH: Achanakmar sanctuary (Nath et al., 2005). RAJASTHAN: Mount Abu (Chaudhary and Deora, 1993; Chaudhary and Deora, 2001; Alam, 2014), Banswara, Kumbhalgarh (Chaudhary and Deora, 1993).

Fissidens flaccidus Mitt. Trans. Linn. Soc. London 23:56, 1860. GUJARAT: Saputara, Vansda National Park, Waghai Botanical Garden, Pavagarh (Chaudhary et al., 2006, as *Fissidens splachobryoides*). MADHYA PRADESH: Pachmarhi (Handoo et al., 2009 as *Fissidens splachobryoides*).

Fissidens geminiflorus Dozy & Molk. J. Hattori Bot. Lab. 32: 272, 1969. RAJASTHAN: Mount Abu (Chaudhary and Deora, 1993, 2001 as *Fissidens geminiflorus* var. *nagasakinus*; Alam et al., 2014), Banswara; Kumbhalgarh; Sirohi; Udaipur, (Bapna, 1980). MADHYA PRADESH: Pachmarhi (Chaudhary and Deora, 1993 as *Fissidens geminiflorus* var. *nagasakinus*) and GUJARAT: Pavagarh, Sabarkantha forest (Chaudhary et al., 2006 as *Fissidens geminiflorus* var. *nagasakinus*).

Fissidens geminiflorus var. *nagasakinus* Iwats., Jour. Hattori Bot. Lab. 32: 272, 1969. → **Fissidens geminiflorus** Dozy & Molk.

Fissidens intromarginatus E.B. Bartram, Rev. Bryol. Lichenol. 23: 242, 1954. → **Fissidens ceylonensis** Dozy & Molk.

Fissidens involutus Wilson ex Mitt. in Musc. Ind. Or. 138, 1859. CHHATISGARH: Bastar (Nath et al., 2011b). JHARKHAND: Chhota Nagpur: Netalhat (Gangulee, 1969-72). MADHYA PRADESH: Amarkantak, (Tiwari et al., 1995, Nath et al., 2011b) Pachmarhi (Nath et al., 2011b).

Fissidens involutus ssp. **curvato-involutus** (Dix.) Gangulee, Mosses E India 2: 548, 1971. CHHATISGARH: Bastar (Gangulee 1969-72; Chaudhary and Deora, 1993; Nath et al., 2007, all as *Fissidens curvato-involutus* Dix.) Achanakmar sanctuary (Nath et al., 2005). GUJARAT: Pavagarh (Chaudhary et al., 2006). MADHYA PRADESH: Amarkantak (Nath et al., 2007). RAJASTHAN: Mount Abu (Chaudhary and Deora, 1993; Chaudhary and Deora, 2001; Alam et al., 2014; all as *Fissidens curvato-involutus* Dix.) Banswara, Udaipur (Chaudhary and Deora, 1993 as *Fissidens curvato-involutus* Dix.). Kumbhalgarh (Chaudhary and Deora, 1993 and Stern, 2000 as *Fissidens curvato-involutus*)

Fissidens macrosporoides Dixon & P. de la Varde, Ann. Cryptog. Exot. 3: 169, 1930. GUJARAT: Girnar hill (Chaudhary et al., 2006; Chaudhary and Sharma, 2007)

Fissidens obscurus Mitt., J. Proc. Linn. Soc., Bot., suppl. 2: 138, 1859. Central India (Lal, 2005, without any locality)

Fissidens orishae Gangulee, Nova Hedwigia 8: 140, 1964. MADHYA PRADESH: Mandla (Kanha national Park) (Kapoor et al., 2011)

Fissidens pulchellus Mitt., J. Linn. Soc. Bot. suppl. 1: 140, 1859. CHHATTISGARH: Achanakmar sanctuary (Nath et al., 2005 as *F. subpulchellus*). MADHYA PRADESH: Pachmarhi (Singh and Kaul, 2002 and Handoo et al., 2009 as *F. subpulchellus*; Nath et al., 2011b) Amarkantak (Tiwari et al., 1995; Nath et al., 2007 as *F. subpulchellus* Norkett).

Fissidens ranchiensis Gangulee, Bull. Bot. Soc. Beng. 11: 68, 1957. JHARKHAND: Ranchi (Gangulee, 1969-72)

Fissidens ranuii Gangulee, Nova Hedwigia 8: 141, 1964. Central India (Lal, 2005 without any locality)

Fissidens sedgwickii Broth. & Dixon, J. Bot. 48: 305, 1910. MADHYA PRADESH: Pachmarhi (Handoo et al., 2009).

Fissidens splachnobryoides Broth. in Schum. & Lauterb., Fl. Deutsch. Schutz. Suedsee: 81, 1900 → **Fissidens flaccidus** Mitt.

Fissidens subpalmatus Müll. Hal., Linnaea 37: 164, 1872. Central India (Lal, 2005 without any locality)

Fissidens subpulchellus Norkett in Gangulee, Mosses E. India 1: 521, 1971 → **Fissidens pulchellus** Mitt.

Fissidens sylvaticus Griff. Calcutta J. Nat. Hist. 2: 507, 1842 → **Fissidens crispulus** Brid. var. **crispulus**

Fissidens sylvaticus Griff. var. **auriculatus** (Mull. Hal.) Gangulee, Mosses E. India 2: 539, 1971. CHHATTISGARH: Achanakmar sanctuary (Nath et al., 2005). MADHYA PRADESH Raisen- Bhimbetka (Nath and Bansal, 2009). RAJASTHAN: Mount Abu (Alam et al., 2014).

Fissidens sylvaticus var. **terracola** (Müll. Hal.) Gangulee, Mosses E. India 2: 539, 1971. RAJASTHAN: Mount Abu (Alam et al., 2014)

Fissidens sylvaticus var. **zippelianus** (Dozy & Molk.) Gangulee, Mosses E. India 1: 537, 1972 → **Fissidens crispulus** var. **crispulus** Brid.

Fissidens taxifolius Hedw. Sp. Musc. 155, 1801. Figs. 5: 1-8. CHHATTISGARH: Achanakmar Sanctuary (Nath et al., 2005). MADHYA PRADESH: Pachmarhi, Amarkantak (Nath et al., 2011b), Patalkot (Gupta et al., 2013).
