Antibacterial and antifungal effects of *Hippocratea velutina* (Afzel.) leaves and its constituents: Experimental and computational approaches

## Supplementary data

**Figure S1:** H-bond interactions of Rutin-DNA-gyrase (a, b), Vitexin-DNA-gyrase (c, d), Rutin-Sterol 14-alpha demethylase (e, f), and Vitexin-Sterol 14-alpha demethylase (g, h).
